ACKNOWLEDGMENT

I SNEHI KAUSHIK take this opportunity to present my votes of thanks to my esteemed faculty

Ms. Ankita Chopra who really acted as pillars to help my way throughout the completion of this practical file. I feel a great sense of gratitude for her under whose guidance and motivation this work has been performed.

I would also like to express my thanks to all lab assistants for giving me an opportunity to work smoothly in the labs. This file would not have completed without their help and coordination.

The inspiration of the faculty members of the Information Technology Department of Jims Rohini (sec-5) enabled me to make a thorough study of these subjects.

JAVA SCRIPT PROGRAMS

Aim: Implement dialogue boxes in Java Script (confirm, alert & prompt)

Code:

```
<html>
```

```
<head>
```

```
<script type = "text/javascript">
```

```
function Warn() {
```

```
    alert ("This is a warning message!");

    document.write ("This is a warning message!");
```

```
}
```

```
function getConfirmation() {
```

```
    var a = confirm("Do you want to continue ?");
```

```
    if( a == true )
```

```
{
```

```
    document.write ("User wants to continue!");
```

```
    return true;
```

```
}
```

```
else {
```

```
    document.write ("User does not want to continue!");
```

```
    return false;
```

```
}
```

```
}
```

```
function getValue() {  
    var b = prompt("Enter your name : ", "your name here");  
    document.write("You have entered : " + b);

Aim: Display the use of conditional control statements in JSP**Code:**

```
<html>
```

```
<body>
```

```
<p>Click the button to get a time-based greeting:</p>
```

```
<button onclick="xyz()">click</button>
```

```

```

```
<script>
```

```
function xyz() {
```

```
    var a;
```

```
    var b = new Date().getHours();
```

```
    if (b < 10) {
```

```
        a = "Good morning";
```

```
    } else if (b < 20) {
```

```
        a = "Good day";
```

```
    } else {
```

```
        a = "Good evening";
```

```
    }
```

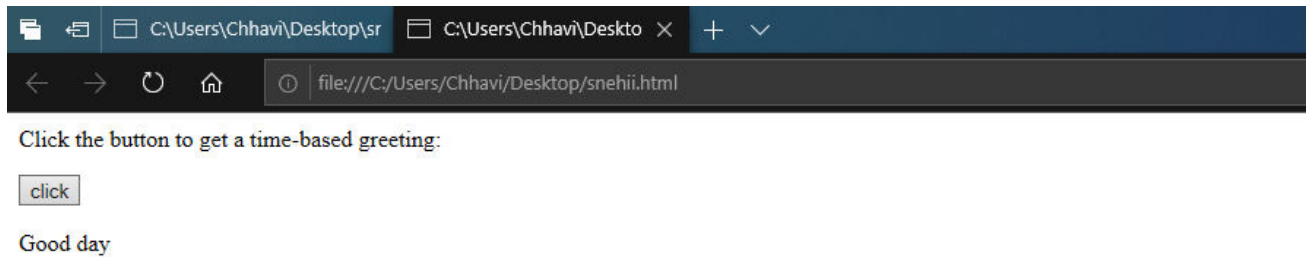

```
    document.getElementById("demo").innerHTML = a ;
```

```
}
```

```
</script>
```

</body>

</html>

OUTPUT:**B.****Aim: Display the use of iterative statements in JSP (for,while, do while)****Code:** <html>
